---	--	---

Project no.: 619209

Project full title: Analysis of Massive Data STreams

Project Acronym: AMIDST

Deliverable no.: D1.1

Title of the deliverable: General methodology for requirement analysis

Contractual Date of Delivery to the CEC:	31.07.2014
Actual Date of Delivery to the CEC:	11.07.2014
Organisation name of lead contractor for this deliverable:	AAU
Author(s):	Antonio Fernández, Sigve Hovda, Helge Langseth, Anders L. Madsen, Andrés Masegosa, Thomas D. Nielsen, Antonio Salmerón
Participants(s):	P01, P02, P03, P04
Work package contributing to the deliverable:	WP1
Nature:	R
Version:	0.5
Total number of pages:	27
Start date of project:	1st January 2014 Duration: 36 month

Project co-funded by the European Commission within the Seventh Framework Programme (2007-2013)		
Dissemination Level		
PU	Public	X
PP	Restricted to other programme participants (including the Commission Services)	
RE	Restricted to a group specified by the consortium (including the Commission Services)	
CO	Confidential, only for members of the consortium (including the Commission Services)	

Abstract:

The General Methodology for requirements analysis document describes the requirements engineering process developed for the AMIDST project. The process adopts a use case-based approach to requirements engineering that is tailored to the specific characteristics of the AMIDST project. These characteristics include a pre-defined project scope, stakeholders from different industries, and the development of a general software framework that can be instantiated according to the needs of the stakeholders.

Keyword list: requirements engineering process, use cases, user groups, stake holders, requirements template.
